In addition, as stated in the OUGFO Memo No. 2022-03-3676 with the subject School-Based Feeding Program Implementation SY 2023-2024, dated December 20, 2022, B. For Milk Component, prepare the necessary data for milk supply mapping

1. *Using the SBFP Proposed List of Schools for FY 2023, start identifying schools recommended for pasteurized, sterilized, and powdered milk. Please identify as many schools as possible which can be served with pasteurized milk because this is the priority under RA 11037. Secondly, identify schools that are recommended and can be served with sterilized milk (schools that are far-flung and not accessible by pasteurized milk and delivery may take long hours). Lastly, identify schools that are best served with powdered milk (schools that are far-flung and not accessible by pasteurized/sterilized milk, delivery may take long hours or days, schools that can only be reached by foot, high delivery cost for sterilized milk).*
2. *For the regional offices, they are requested to validate the schools recommended for SMP and powdered milk. Please note that RA 11037 only recommends the serving of fresh milk or fresh milk-based products. However, after implementing the milk component for three (3) years, it was observed and duly noted that there are schools that are best served with powdered milk and fresh milk or fresh milk-based products are no longer practical to be served.*
3. *Use SY 2021-2022 nutritional status data by school from the Planning Service or they can use their 2022 data if already available.*
