Certificate Course on the Foundations of Knowledge Management

Batch 4

The series of certificate courses on Knowledge Management (KM) is a competency-based professional certification where students progressively acquire or develop KM competencies that enable them to share and use knowledge as they perform their jobs, and start and manage KM initiatives in their respective organizations. The certificate courses vary in terms of focus to respond or cater to the specific needs of prospective students. Each course consists of competency-based modules, which require students to submit outputs on applications of lessons learned from the modules. Some of these courses may be credited towards the Master of Public Management major in Knowledge Management (MPM-KM), should students opt to pursue and earn higher qualifications.

The first among the series of KM certificate courses is on KM Foundations which is an introduction to the practice of KM in organizations. System thinking is used as a framework to guide the KM practice. Managing the context of KM provides the springboard for organizations to start their respective journey with KM.
